

The College Readiness Indicator Systems (CRIS) framework articulates the interrelated components that make up an effective college readiness indicator system.

The CRIS initiative, sponsored by the Bill & Melinda Gates Foundation, aimed to develop and study the implementation of a system of signals and supports designed to increase the number of students who graduate from high school ready to succeed in college. Three research organizations - the Annenberg Institute for School Reform at Brown University, the John W. Gardner Center for Youth and Their Communities at Stanford University, and the University of Chicago Consortium on Chicago School Research - partnered with four urban school districts and one school support network to conduct the initiative.

[Please see the six-part CRIS Resource Series for a more detailed account of our research.](#)

OVERVIEW OF CRIS FRAMEWORK

The CRIS framework features:

- Indicators to target three distinct yet interdependent college readiness dimensions: **Academic Preparedness**, **College Knowledge**, and **Academic Tenacity**;
- A tri-level approach premised on the idea that an effective set of indicators generates data that reflect activities, processes, and outcomes at the **individual (student)**, **setting (school)**, and **system (district and partners) levels**; and
- A **Cycle of Inquiry** that connects indicators for each dimension and at each level with the appropriate supports.

[See the CRIS Framework Narrative for more information.](#)

COLLEGE READINESS

TAKE STOCK & PRIORITIZE

Prior to the selection of indicators, the district identifies its college readiness goals and how they might differ for different groups of students (e.g., by achievement level). It takes stock of its available resources, challenges, and needs and prioritizes actions to take. A parallel process occurs at the school level, where each school takes stock of the demographics and achievement of their current and prior population of students and related needs and prioritizes actions. With this information, the district or school can proceed with the selection of indicators in each college readiness dimension and at each level. [The CRIS District Self-Assessment Tool provides guidance to districts engaging in this process.](#)

SELECT INDICATORS

Schools and districts next select indicators in each college readiness dimension and at each level. Three CRIS products can help with this step; see the Menu of College Readiness Indicators, and Supports, Selecting Effective Indicators, and A Technical Guide to College Readiness Indicators for more information.

COLLEGE READINESS

College ready students have the skills, knowledge and beliefs necessary to succeed in college. College ready schools and districts provide the resources and opportunities for students to graduate high school ready for college.
